

Regulator & framework crosswalk

ACA is the common control language beneath the frameworks — one assessment serves many obligations.

FRAMEWORK	WHAT IT REQUIRES	HOW ACA SUPPORTS IT
NIST AI RMF	Govern · Map · Measure · Manage the AI lifecycle	Inventory & classification · risk tiering · assurance & testing · monitoring · incident containment
ISO/IEC 42001	An AI management system: context, leadership, planning, operation, evaluation	Ownership & governance model · risk tiering · control implementation across all pillars · maturity & metrics
EU AI Act	System classification, risk management, data governance, logging, transparency	Inventory & tiering · data boundary control · monitoring & evidence · output/decision control · documentation
SR 11-7	Model risk: development/use, validation & effective challenge, governance	Inventory · data/input/output/tool controls · assurance & testing · monitoring · human accountability
NYDFS Part 500	Cybersecurity program, CISO oversight, access, risk assessment, third parties	Human accountability · identity & access control · data boundary · vendor AI review · monitoring & evidence
OWASP LLM & Agentic	Prompt injection, sensitive-info disclosure, supply chain, excessive agency	Input control · data boundary · tool & action control · identity & access · assurance · containment
